## WATER CONSERVATION MEASURE **STAGE 3.5** **EFFECTIVE IMMEDIATELY**

Water systems currently on Stage 4, **except Parkwood**, are now on Stage 3.5. **Parkwood remains on Stage 4 until further notice.**

### **Stage 3.5 allows:**

- Drip Irrigation of trees and bushes 2 days a week during scheduled water use.  
Even numbered address on Wednesday and Sundays  
Odd numbered addresses on Tuesday and Saturday  
Before 11am and after 7pm  
**No run-off from your drip system is allowed**
- Replacement of evaporated water from pools, in order to maintain specific levels.
- Water use for animals and livestock.
- Watering of food sources, such as vegetable gardens, can be done by means of drip irrigation following the Stage 3.5 restrictions.
- **No** watering of lawns
- **No** use of sprinklers
- **No** washing of cars

The Department will continue to monitor the system and adjust the Water Conservation Stages accordingly to properly serve the residents. Should the system tolerate the additional water demand other restrictions will be lifted as appropriate and approved by the Board of Supervisors. Thank you for your understanding and patience on this important matter.

If you have any questions please call the Special Districts Division at (559) 675-7820.
